### SUMMARY

My curiosity about technology since childhood has directed me towards this field, and now having completed my university education, I am striving to take my passion to a more professional level. By supporting open-source projects, I endeavor to contribute to both my personal growth and the community by engaging in meaningful endeavors

### SKILLS

Django, Django REST Frame, Python, Node.js, Express.js, Javascript, MySQL, MongoDB, Docker, Git, Linux

### EDUCATION

9/2018 - 7/2022 **Management Information Systems** **Necmettin Erbakan University - Bachelor's Degree**  
Taking both business and coding courses at university provided me with the opportunity to understand both technology and the business world. This experience has enabled me to develop a deeper understanding of how programming and marketing can be integrated in today's business world, bringing together the realms of technology and commerce.

### WORK EXPERIENCE

3/2022 - 7/2022 **Web Developer** **Oyos Software**  
• I worked as a Web Developer for four months, and this experience was truly valuable for me. During my time at the workplace, I made significant progress through project-based work, strengthening my skills in fundamental web technologies such as HTML, CSS, and JavaScript. I was involved in tasks such as adding and removing products on the website and updating the interface.  
Technologies: **Html / Css / JavaScript / MySql**

### PROJECTS

2024 **Finance Tracker** **Project Link**  
A personal finance tracking application where users can manage their income and expenses.  
Technologies: **Django REST Frame / Python / Bootstrap**

2024 **Python-Docs-TR** **Project Link**  
Contributed to the translation of Python's official documentation into Turkish. This effort aimed to facilitate access to Python documentation for Turkish developers and to contribute to the open-source community.

2023 **EventCrafter** **Project Link**  
A dynamic web project where users can register and log in to create and join marathon events. The platform allows users to not only participate in marathons but also leave comments and engage with the community.  
Technologies: **Django / Python / Bootstrap / Css**

2023 **SmartEduPortal** **Project Link**  
Created an educational portal where students can enroll in courses and teachers can create and manage their own courses. The platform includes user registration and login functionalities.  
Technologies: **Node.js / Express.js / Javascript / Bootstrap**

### HOBBIES

Cycling, Bug Bounty, Cyber Security Research, Contribution to Open Source Projects

### LANGUAGES

English - B1
